Alvin Saju

Technical Assistant | Data Management | Technology & Workflow Support

MSc Big Data Management & Analytics | Computer Science Graduate | Dublin, Ireland

alvinsaju86@gmail.com | +353 892555607 | Dublin, Ireland

Portfolio | LinkedIn | GitHub

Professional Profile

Recent MSc graduate in Big Data Management and Analytics with a B.Tech in Computer Science and Engineering. Practical experience using databases, business software and data workflows to solve technical and operational problems. Developed Python- and SQL-based solutions, automated recurring processes, investigated data-quality issues and translated stakeholder requirements into reliable outputs. Confident communicating with colleagues and customers, learning unfamiliar applications and working accurately in busy environments. Motivated to build a career in legal technology and eDiscovery, supporting the effective management of complex projects, documents and information.

Technical & Professional Skills

Programming & Databases:	Python, SQL, PostgreSQL, MySQL, Google BigQuery
Data & Workflows:	ETL/ELT, data transformation, workflow automation, data validation, process improvement
Information Management:	Data quality checks, structured datasets, data modelling, GDPR-aware data handling
Software & Tools:	Git/GitHub, FastAPI, Kafka, Docker, Linux, Microsoft Excel
Reporting Applications:	Power BI, Tableau, DAX, dashboard development, KPI reporting
Libraries:	Pandas, NumPy, scikit-learn, SHAP
Workplace Skills:	Technical problem-solving, requirements gathering, customer communication, teamwork, adaptability

Professional Experience

Catering Assistant – Front of House **Mar 2026 – Present**

Marquette, Dublin Airport *Dublin, Ireland*

- Provide customer-facing service in a busy airport environment, responding to requests clearly and professionally while maintaining service standards.
- Coordinate with colleagues, follow operational procedures and respond calmly to day-to-day issues in a time-sensitive setting.

Reporting Analyst (Part-time, Remote) **Dec 2025 – Jun 2026**

Briticana *Ireland*

- Wrote and optimised **20+ SQL queries** across PostgreSQL and BigQuery, reducing a typical reporting process from approximately two hours to one hour and 40 minutes.
- Designed and maintained approximately **10 Power BI and Tableau dashboards**, including data models, DAX measures and automated refresh pipelines.
- Produced weekly, monthly and ad hoc reports for approximately five stakeholders, translating requirements into clear and useful outputs.
- Investigated discrepancies across **3–5 reporting feeds** and applied validation checks to improve data consistency and reliability.
- Collaborated remotely with business analysts and senior stakeholders to refine requirements and improve reporting workflows.

Data Analyst Intern **Sep 2024 – Dec 2024**

Idatalytics *Kochi, India*

- Built Python- and SQL-based workflows to clean, transform and analyse datasets containing approximately **75,000 rows**.
- Automated recurring reporting tasks using Python, saving an estimated **3–5 hours per week** by reducing repetitive manual work.
- Designed data models and optimised SQL queries, reducing processing time by approximately **20–30%** across analytical pipelines.
- Developed interactive Power BI and Tableau dashboards to communicate KPIs, operational metrics and business trends.
- Worked with cross-functional teams to understand requirements and deliver practical data solutions.

Selected Technical Projects

MSc Dissertation – Urban Traffic Congestion Prediction GitHub

Built a distributed analytics and machine-learning solution using Dublin SCATS traffic sensor data. Used Python, pandas, scikit-learn, Random Forest, TensorFlow GRU and Kafka to analyse and forecast congestion patterns.

Fraud Detection API and Machine Learning System GitHub
Developed a transaction fraud detection model using Python and scikit-learn, exposed predictions through a FastAPI service and used SHAP to explain model decisions.

Customer Churn Prediction GitHub
Built a churn prediction model using Python and scikit-learn, applied SHAP to identify key churn drivers and presented at-risk customer insights through an interactive Streamlit dashboard.

Education

MSc in Big Data Management and Analytics **Feb 2025 – Jun 2026**
Dublin, Ireland

Griffith College Dublin
Second Class Honours

B.Tech in Computer Science and Engineering **Oct 2020 – Jun 2024**
India

Viswajyothi College of Engineering and Technology
CGPA: 9.19/10

Certifications & Additional Information

Certifications: Google AI Essentials (Google); Use AI Responsibly (Google).
Languages: English (Fluent), Malayalam (Native).
Career Interest: Legal technology, eDiscovery, document and data workflows, and technology-enabled client services.
